Projects

Rebuilt Responsive Website

[Live Site](#) | [GitHub Repo](#)

Redesigned and rebuilt a professional website with full mobile responsiveness using semantic HTML, CSS Flex/Grid, and JavaScript structure.

- Added interactive design elements and UI enhancements.
- Implemented responsive layouts across breakpoints.
- Demonstrated progress and ownership through GitHub commits and ongoing iterations.

SaaS App (WIP - Stealth Build)

Currently building a SaaS web application with React. Project emphasizes scalable components, secure login, and modular UI.

- Developed custom user dashboard components.

- Building architecture with future deployment in mind.

👉 **Weather App (UI-Focused Build)**

Created a dark-themed, animated weather app with Orbitron font, neon-glow UI, animated particles, and transition effects.

- Practiced real API integration with styled feedback and forecast data.

🎬 **FlickFinder** (*In Progress*)

A movie and TV search app using The Movie DB API to explore trending and search results in real time.

- Responsive design and loading states with animation effects.
